

“The sexiest heroes support your dreams.”

Tawny Weber believes in heroes. In fact, she’s made her career writing about heroes, most notably her popular Navy SEALs series for Harlequin Blaze. Over thirty books later, she’s not only been published in sixteen countries, she’s made it onto the New York Times and USA Today bestseller lists multiple times. To her, though, it all comes down to heroes... with one hero in particular getting the most credit.

“My husband has supported me in everything,” Weber says. “When it came to writing, he not only saw my dream before I did, he was the first one to push me forward, and to support me through all of the ups and downs of my career.”

That support led her first to writing classes, then joining the Romance Writers of America. There, she learned not only the craft, but the business of writing romantic fiction. In a crowded marketplace, she’s managed to stand out with her signature style of sexy protagonists and sassy, humorous voice, while maintaining the emotional core that draws her readers back for more.

“I know the hardships, joys, and pride of being married to a military man, and because of that, I know what duty and honor truly mean. That’s why I love writing strong alpha heroes. To me, a hero does what needs to be done, whether it’s leaping tall buildings, protecting his family – or inspiring screaming orgasms!” she adds, with a laugh. “And a true hero sees the strength in the woman he loves, and finds that strength sexy. He nurtures her dreams, and empowers her.”

Now, with her real-life hero, she lives in Northern California, homeschooling her two children, caring for her sweet and crazy herd of dogs, staying connected with her readers, promoting her titles... and, of course, writing more novels about the heroes we can’t get enough of.
